

LUMPBREAKERS

Standard And Custom Models At One Low Price

From batch runs to continuous operation, Buffalo Hammer Mill offers a lumpbreaker that meets your demanding specifications. Choose from a wide selection of standard models or have us custom-engineer a lumpbreaker for your application at no extra charge. Standard or custom, you'll receive superior service, performance and value – all at a surprisingly low cost.

BD Series

The perfect solution to your process and material handling needs.

- Low initial cost, high capacity, low energy consumption
- Rugged carbon or stainless steel construction
- Multiple configurations, including completely integrated production lines
- Low maintenance, easy to service, readily available parts

KE GRIZZLY SERIES

The heavy-duty choice for demanding process applications.

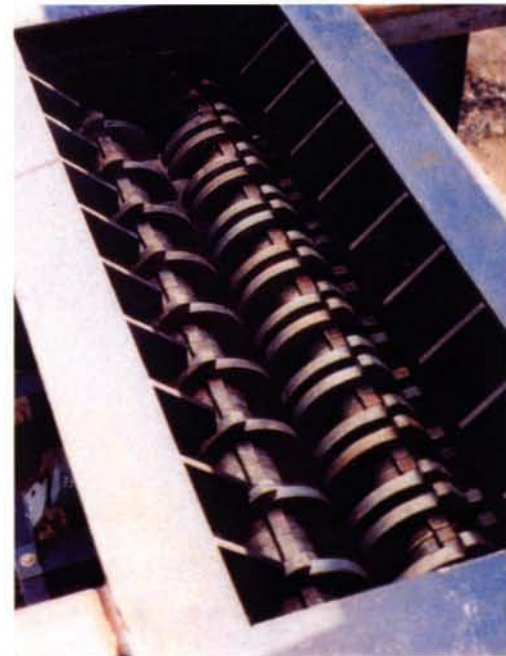

- Capacities to over 500 tph
- Twin shaft construction, abrasion-resistant components
- Wide variety of configurations
- Auto-reversing mode
- Rugged construction for minimal maintenance and easy service
